**Reference: Purchase Management at FCC Construction**

In order to improve the Procurement Service in FCC Construction, and align this function to the purchasing and supply needs of our projects all over the world, it will be directly supervised by the FCC Construction General Management.

The FCC Group General Directorate of Organization will be responsible for coordinating the teams and Mr. Jaime Peromarta, Chief Procurement Manager, has been appointed to manage and coordinate all purchasing-related duties with the aim of:

- **Restructuring and transforming the Procurement Service at FCC Construction**, establishing new and standard policies and regulations at both national and international level, accordingly to Group policies and regulations.
- **Providing** a Procurement Management Service to all FCC Construction work centers.
- **Identifying** efficiencies at FCC Construction and synergies with the rest of the Group, with the aim of enhancing our negotiation power and, as a result, creating greater value.
- **Introducing** a unique, comprehensive and group-wide electronic tool for managing offers.
- **Standardize** the products and services procured by FCC Construction.

To ensure **successful transition and implementation**, this project will be launched in several stages; starting in Spain and moving on to other areas. We are counting on maximum **participation, collaboration and support** from all those involved within the Group and we thank you all in advance for your dedication to the project.

For any matters related to Procurement Management at **FCC Construction**, please contact the Procurement Management office by telephone or by sending an email to [comprasCO@fcc.es](mailto:comprasCO@fcc.es)

We will keep you informed of progress on this project over the next couple of month, the measures that will be required and of those responsible for their implementation.

Kind regards

**Vicente Mohedano Martín**  
Managing Director of FCC Construcción
